

West Nottingham Chapel is located just east of the Church and adjoins it by a hyphen built in 1930. As the plaque, on the west gable indicates, the Chapel was built in "1880 by the Ladies of the Congregation aided by a bequest of Sarah E. Patterson." The plaque is located in the west gable above two stain glass windows and beneath a round vent. The entrance with its double arched doors and pent hood is located at the west end of the south side. Between each windows, which have 9/9 sash and segmental arched heads is a small buttress built of the same granite as the rest of the structure. Above each buttress is a large bracket, supporting the wide overhang of the eaves. Chamfered braced members are exposed in the apex of the west gable. There is a brick chimney in the east gable.
